CFR Gateway

Secure. Compliant. Audit-Ready.

Transform non-compliant instruments into 21 CFR part 11 compliant systems

CFR Gateway is a compliance wrapper for laboratory instruments and software, developed by Agaram Technologies to enforce data integrity in systems that lack built-in controls. It delivers full compliance with FDA 21 CFR Part 11 and EU Annex 11—without requiring replacement or modification of your existing setup.

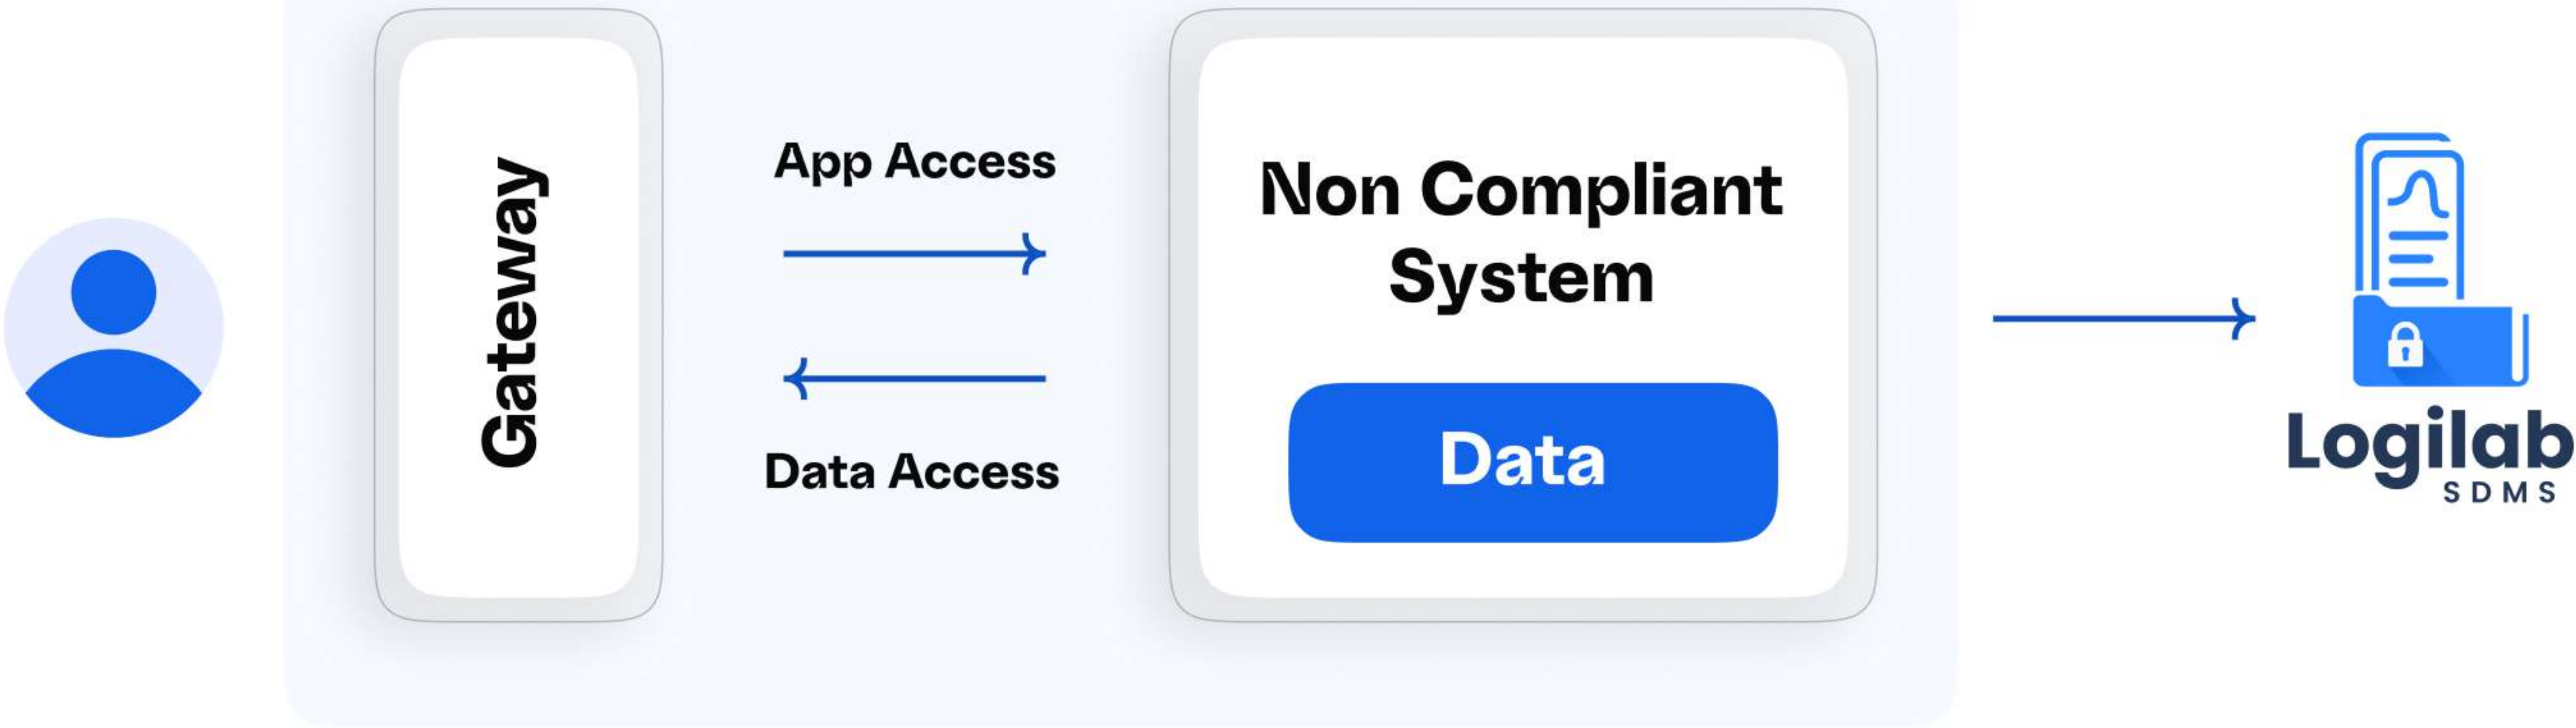

Whether you're running modern systems or aging legacy tools, CFR Gateway ensures your lab remains secure, traceable, and audit-ready by design.

Enforce 21 CFR Part 11 Compliance & Product Data Integrity

The Compliance Layer Your Instruments Have Been Missing

CFR Gateway is purpose-built to create a secure, controlled, and auditable lab environment for instruments and software not inherently designed for compliance. It aligns with global data integrity standards including 21 CFR Part 11, EU Annex 11, and ALCOA+ principles, helping labs meet regulatory requirements with confidence.

Compliance-Driven Features That Matter

Make Your Non-Compliant Systems & Instruments Compliant.

Validated System Boot & Secure Launch Environment

Starts the system in a validated state. Prevents any user or application interaction until compliance policies are enforced.

Application Whitelisting & Isolated Execution (Black Box Mode)

Only authorized applications can run. All software executes in a controlled zone, with restricted access to Windows Explorer, command prompts, and external utilities.

Desktop & File Operation Lockdown

Restricts desktop-level actions. Files can only move through compliant, pre-approved channels—ensuring nothing bypasses the system controls.

Version Control & Overwrite Prevention

All file versions are retained. Prevents accidental or intentional overwriting, ensuring every data point is historically traceable.

Comprehensive Access Control & Session Management

Implements role-based user access at the OS level. Idle sessions are automatically timed out to reduce risk from unattended terminals.

Immutable Audit Trails For Full Traceability

Captures every user interaction—who, what, when, where, and optionally why—with tamper-proof logging that simplifies audits and inspections.

Operational Impact Of CFR GATEWAY

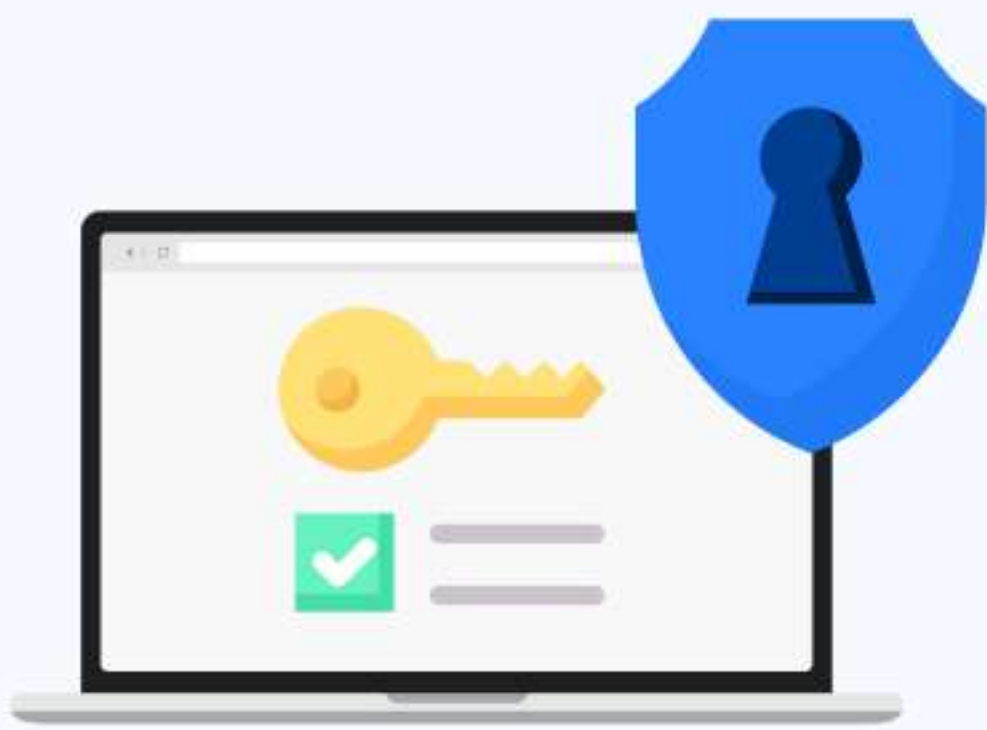

Stop Data Tampering At The Source

Eliminates *data tampering and* **unauthorized** *file handling*

Deploy Fast, Maintain Easily

Build-In Access Control

Restricts app & Data access

by role—only authorized users allowed.

Gateway
C F R

Secure. Compliant. Audit-Ready.

Reduces IT overhead with wizard-based setup and

light maintenance

Make Any Analytical Instrument 21 CFR Part 11 Compliant

Enables legacy systems to meet

Digital compliance mandates

Centralized Audit Logs

Simplifies audits with built-in

traceability and centralized review

Why CFR GATEWAY MATTERS

By Capturing data automatically, versioning results, and restricting unauthorized access, CFR Gateway eliminates many of the root causes of data loss or manipulation. It provides labs with a secure, traceable, and compliant environment that simplifies regulatory audits and upholds data integrity by design.
