LIMS

A Secure, Highly Configurable Laboratory Information
Management System for Quality and Research Labs

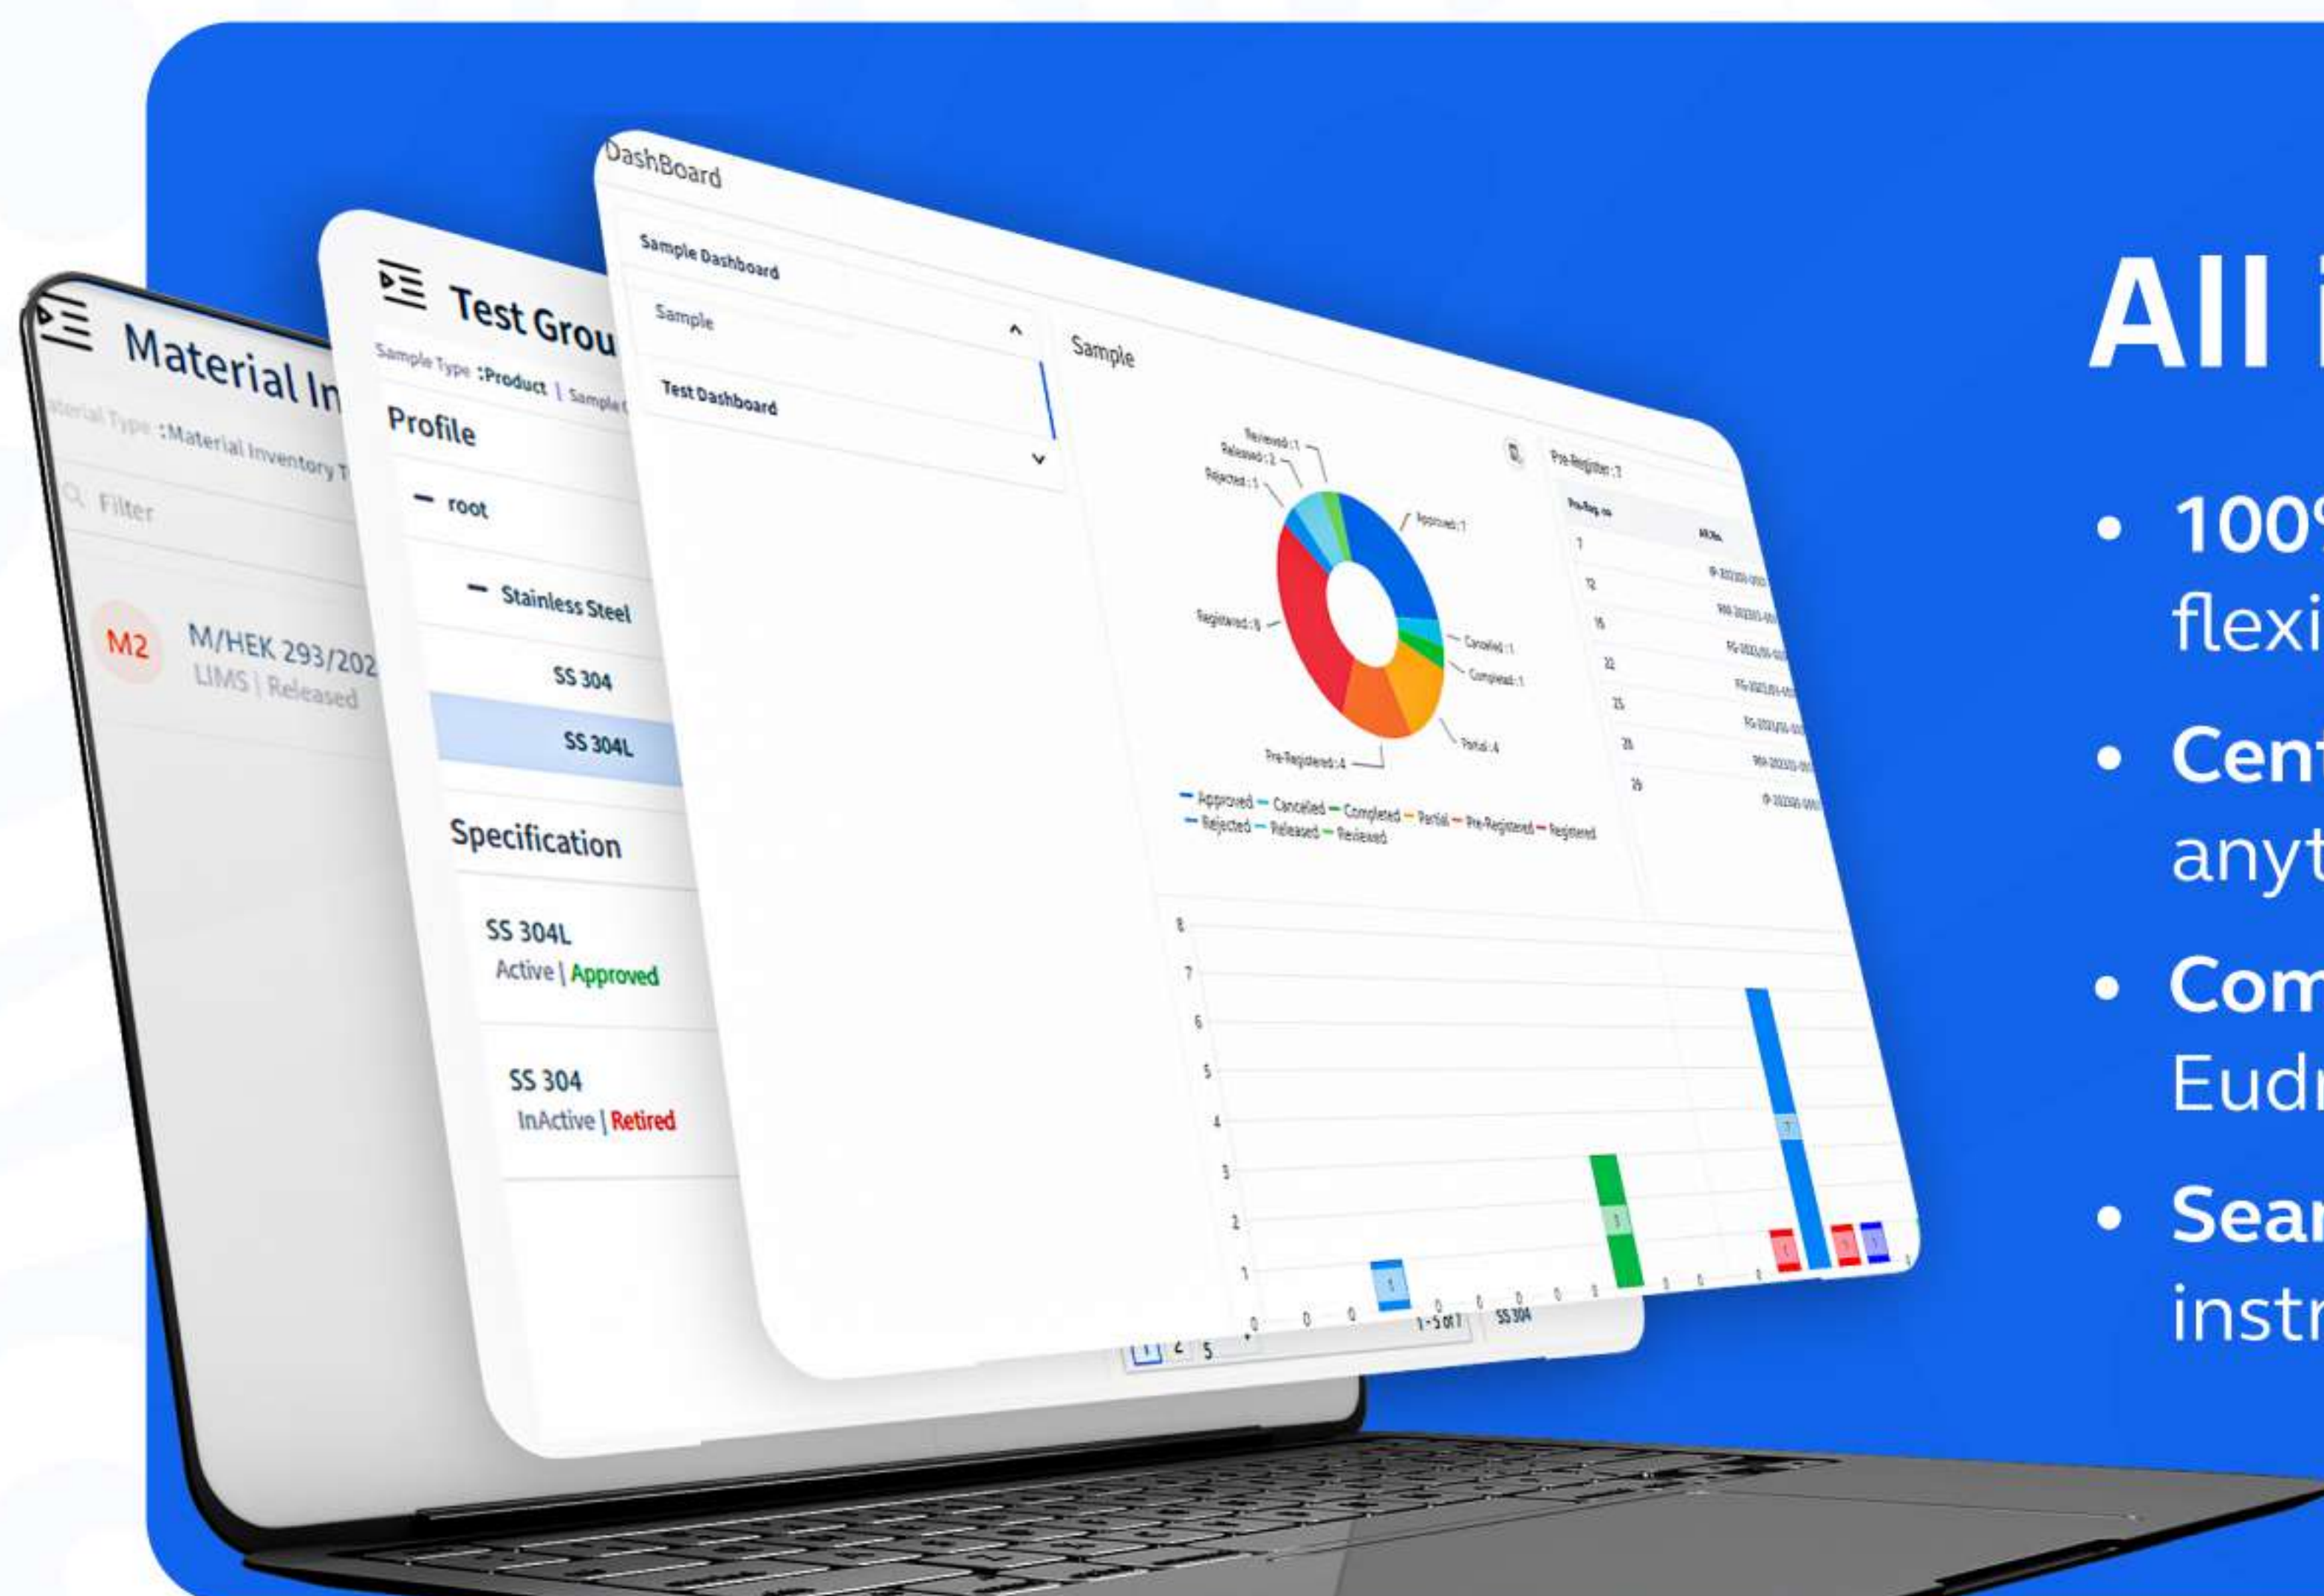

www.agaramtech.com

Qualis LIMS

A Smarter Approach to Lab Compliance, Automation, and Reporting

Qualis LIMS is an intuitive, powerful solution for managing and tracking lab samples & data, ensuring complete traceability of all samples/tests within your lab. By streamlining quality control and enhancing collaboration, transform your lab into a seamless, data-driven environment with reliable, accessible records.

All in one LIMS platform

- **100% Configurable** – No rigid templates, just full flexibility.
- **Centralized, secure data** – Access lab information anytime, from anywhere.
- **Compliance Ready** – Supports GxP, 21 CFR Part 11, EudraLex Annex 11 & other regulatory standards.
- **Seamless Integration** – Works with existing lab instruments and external systems.

End-to-End Sample Lifecycle Management

From collection to disposal, every sample needs to be tracked. Qualis LIMS offers complete visibility into samples entering your lab, tests performed, and results recorded—accessible from anywhere in the world, ensuring smooth and efficient management at every stage.

Sample registration

Easily register incoming samples with detailed metadata

1

2

Allocation of work

Allocate/Assign tests to trained & qualified lab personnel

3

Result Entry (Manual, Instrument interface)

Enable seamless result entry either manually or automatically through direct integration with analytical instruments

4

Release and report

Validate and approve test results before generating dynamic reports

Beyond Basic Lab Management

Empowering Efficiency, Compliance, and Growth.

KPI Monitoring – See How Your Lab is Performing at a Glance

Proactive Dashboard

Gain instant insights with configurable KPI dashboards. Track key metrics like turnaround times, compliance rates, and resource utilization. Visualize trends to make data-driven decisions and optimize lab performance.

Automated Alerts

Set up automated alerts for role-specific notifications and inventory thresholds, ensuring timely updates on critical actions and stock shortages to maintain smooth lab operations.

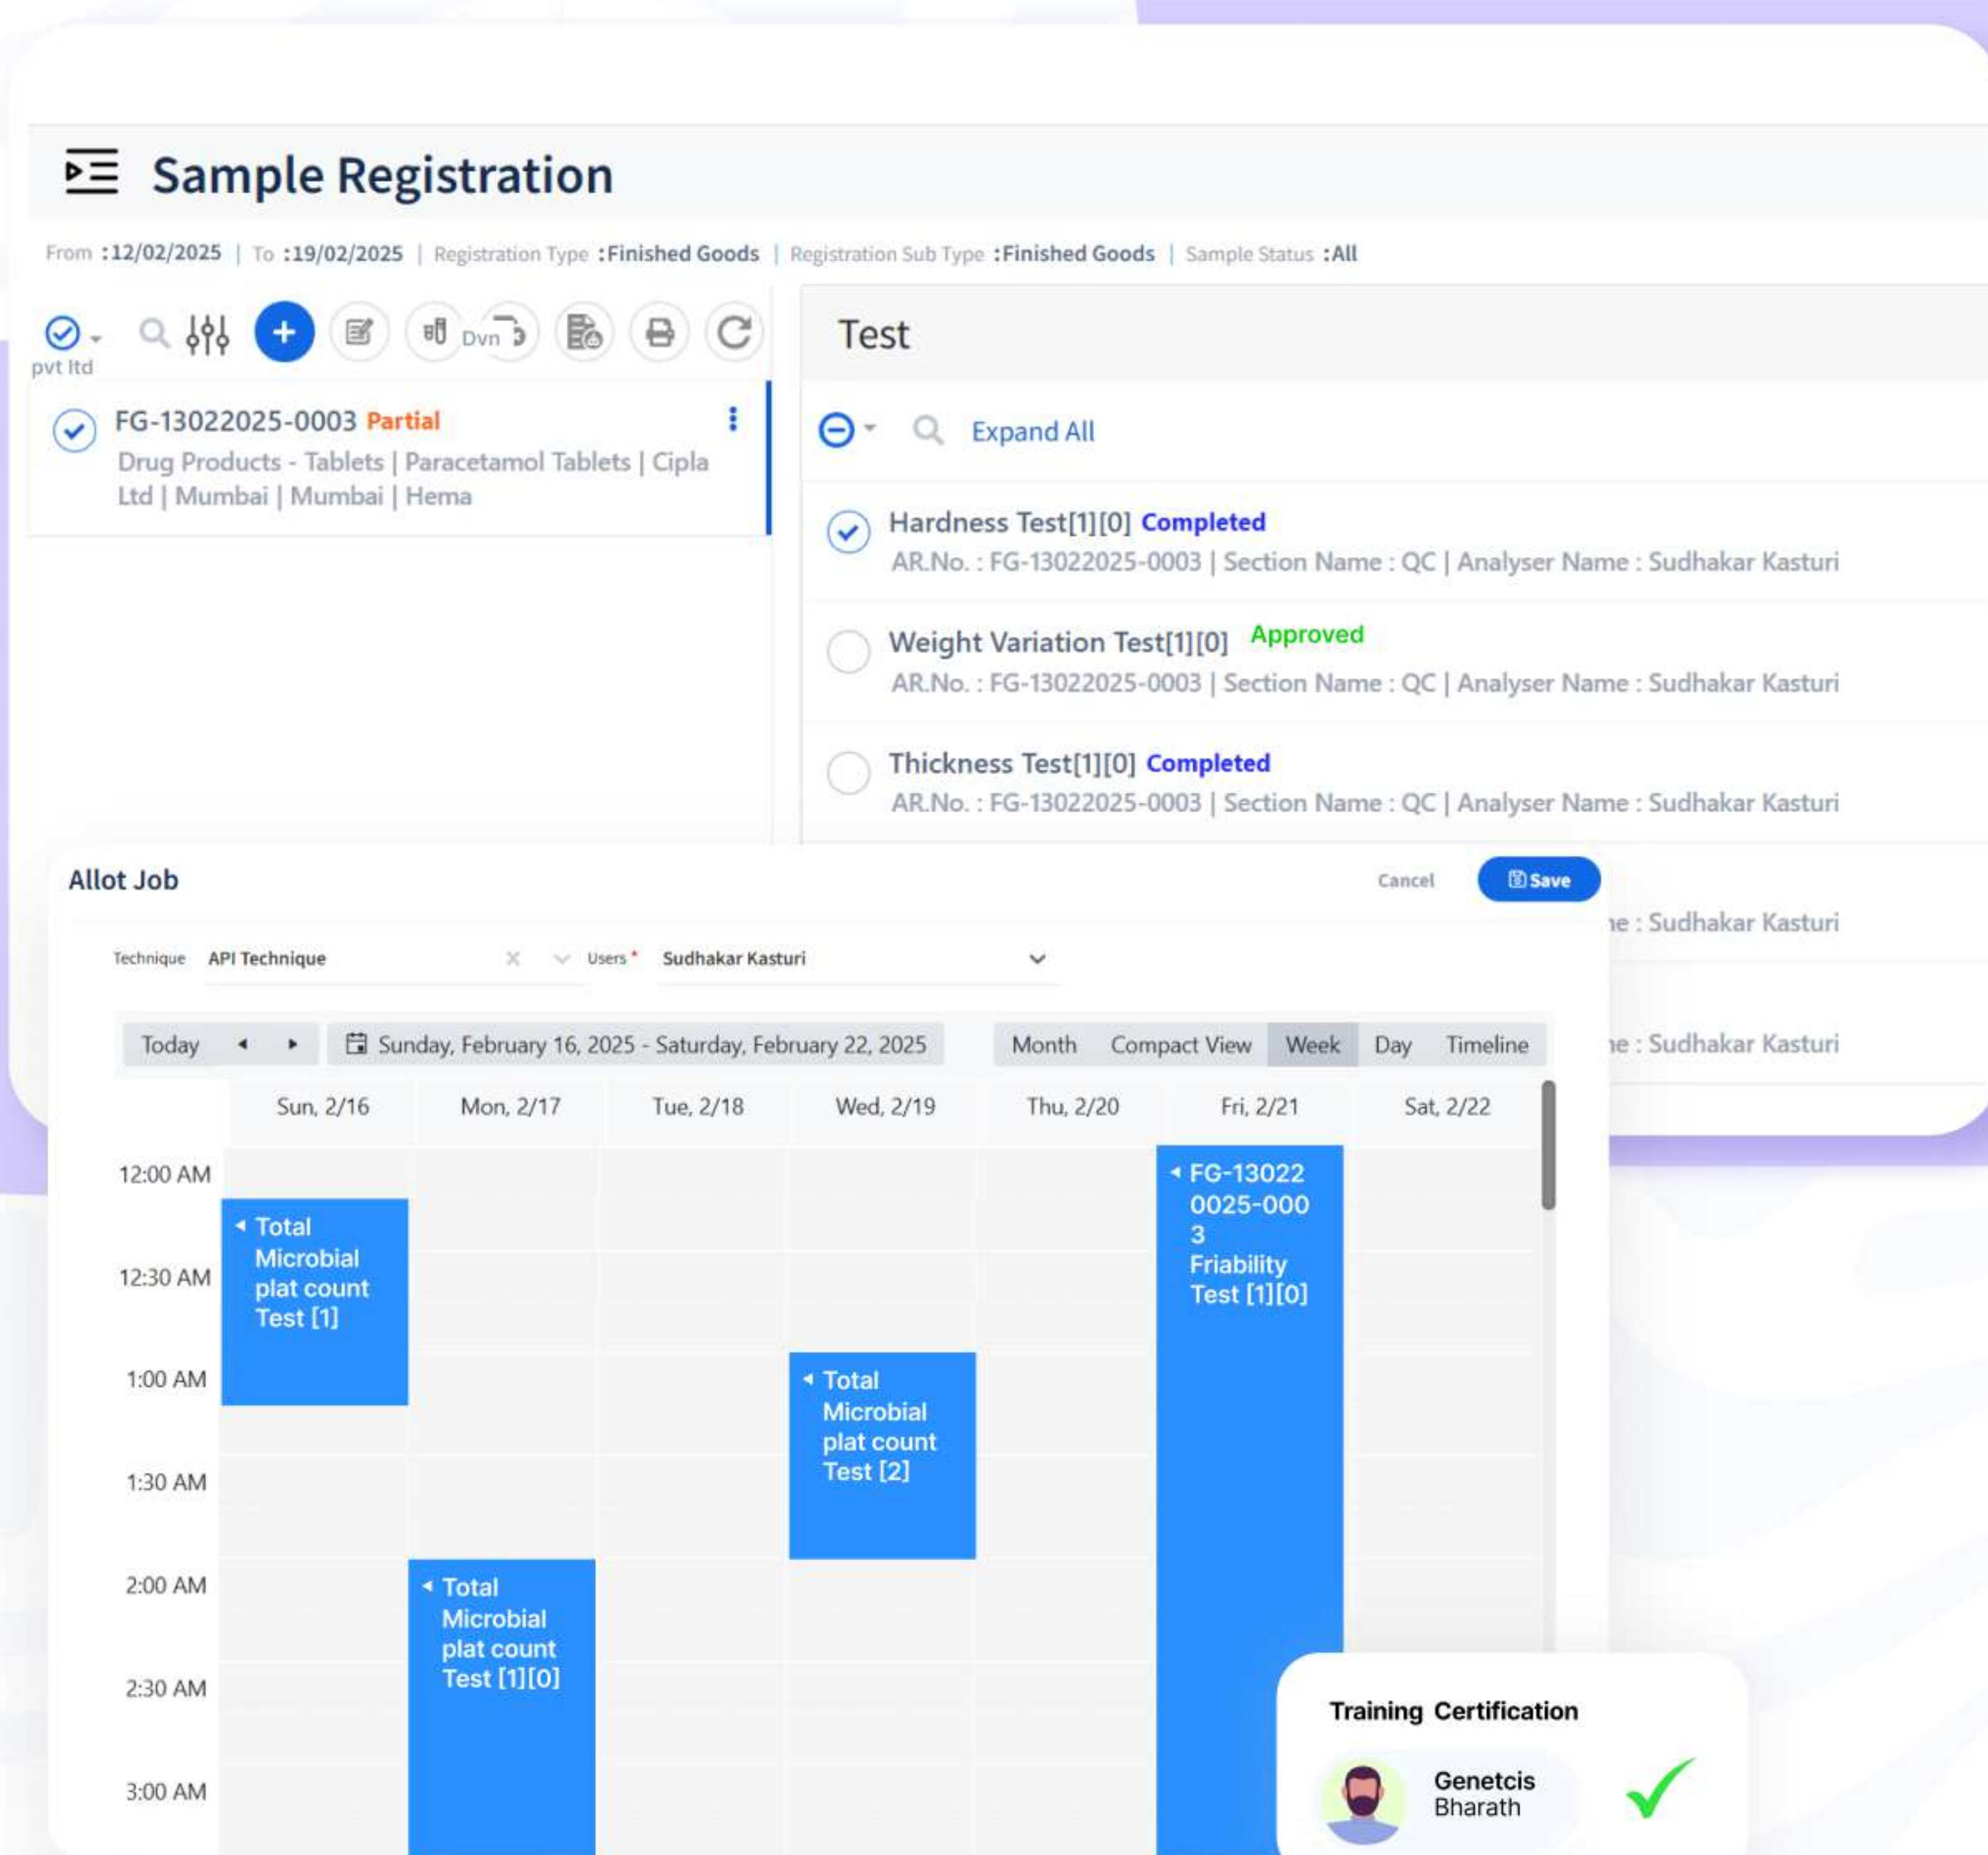

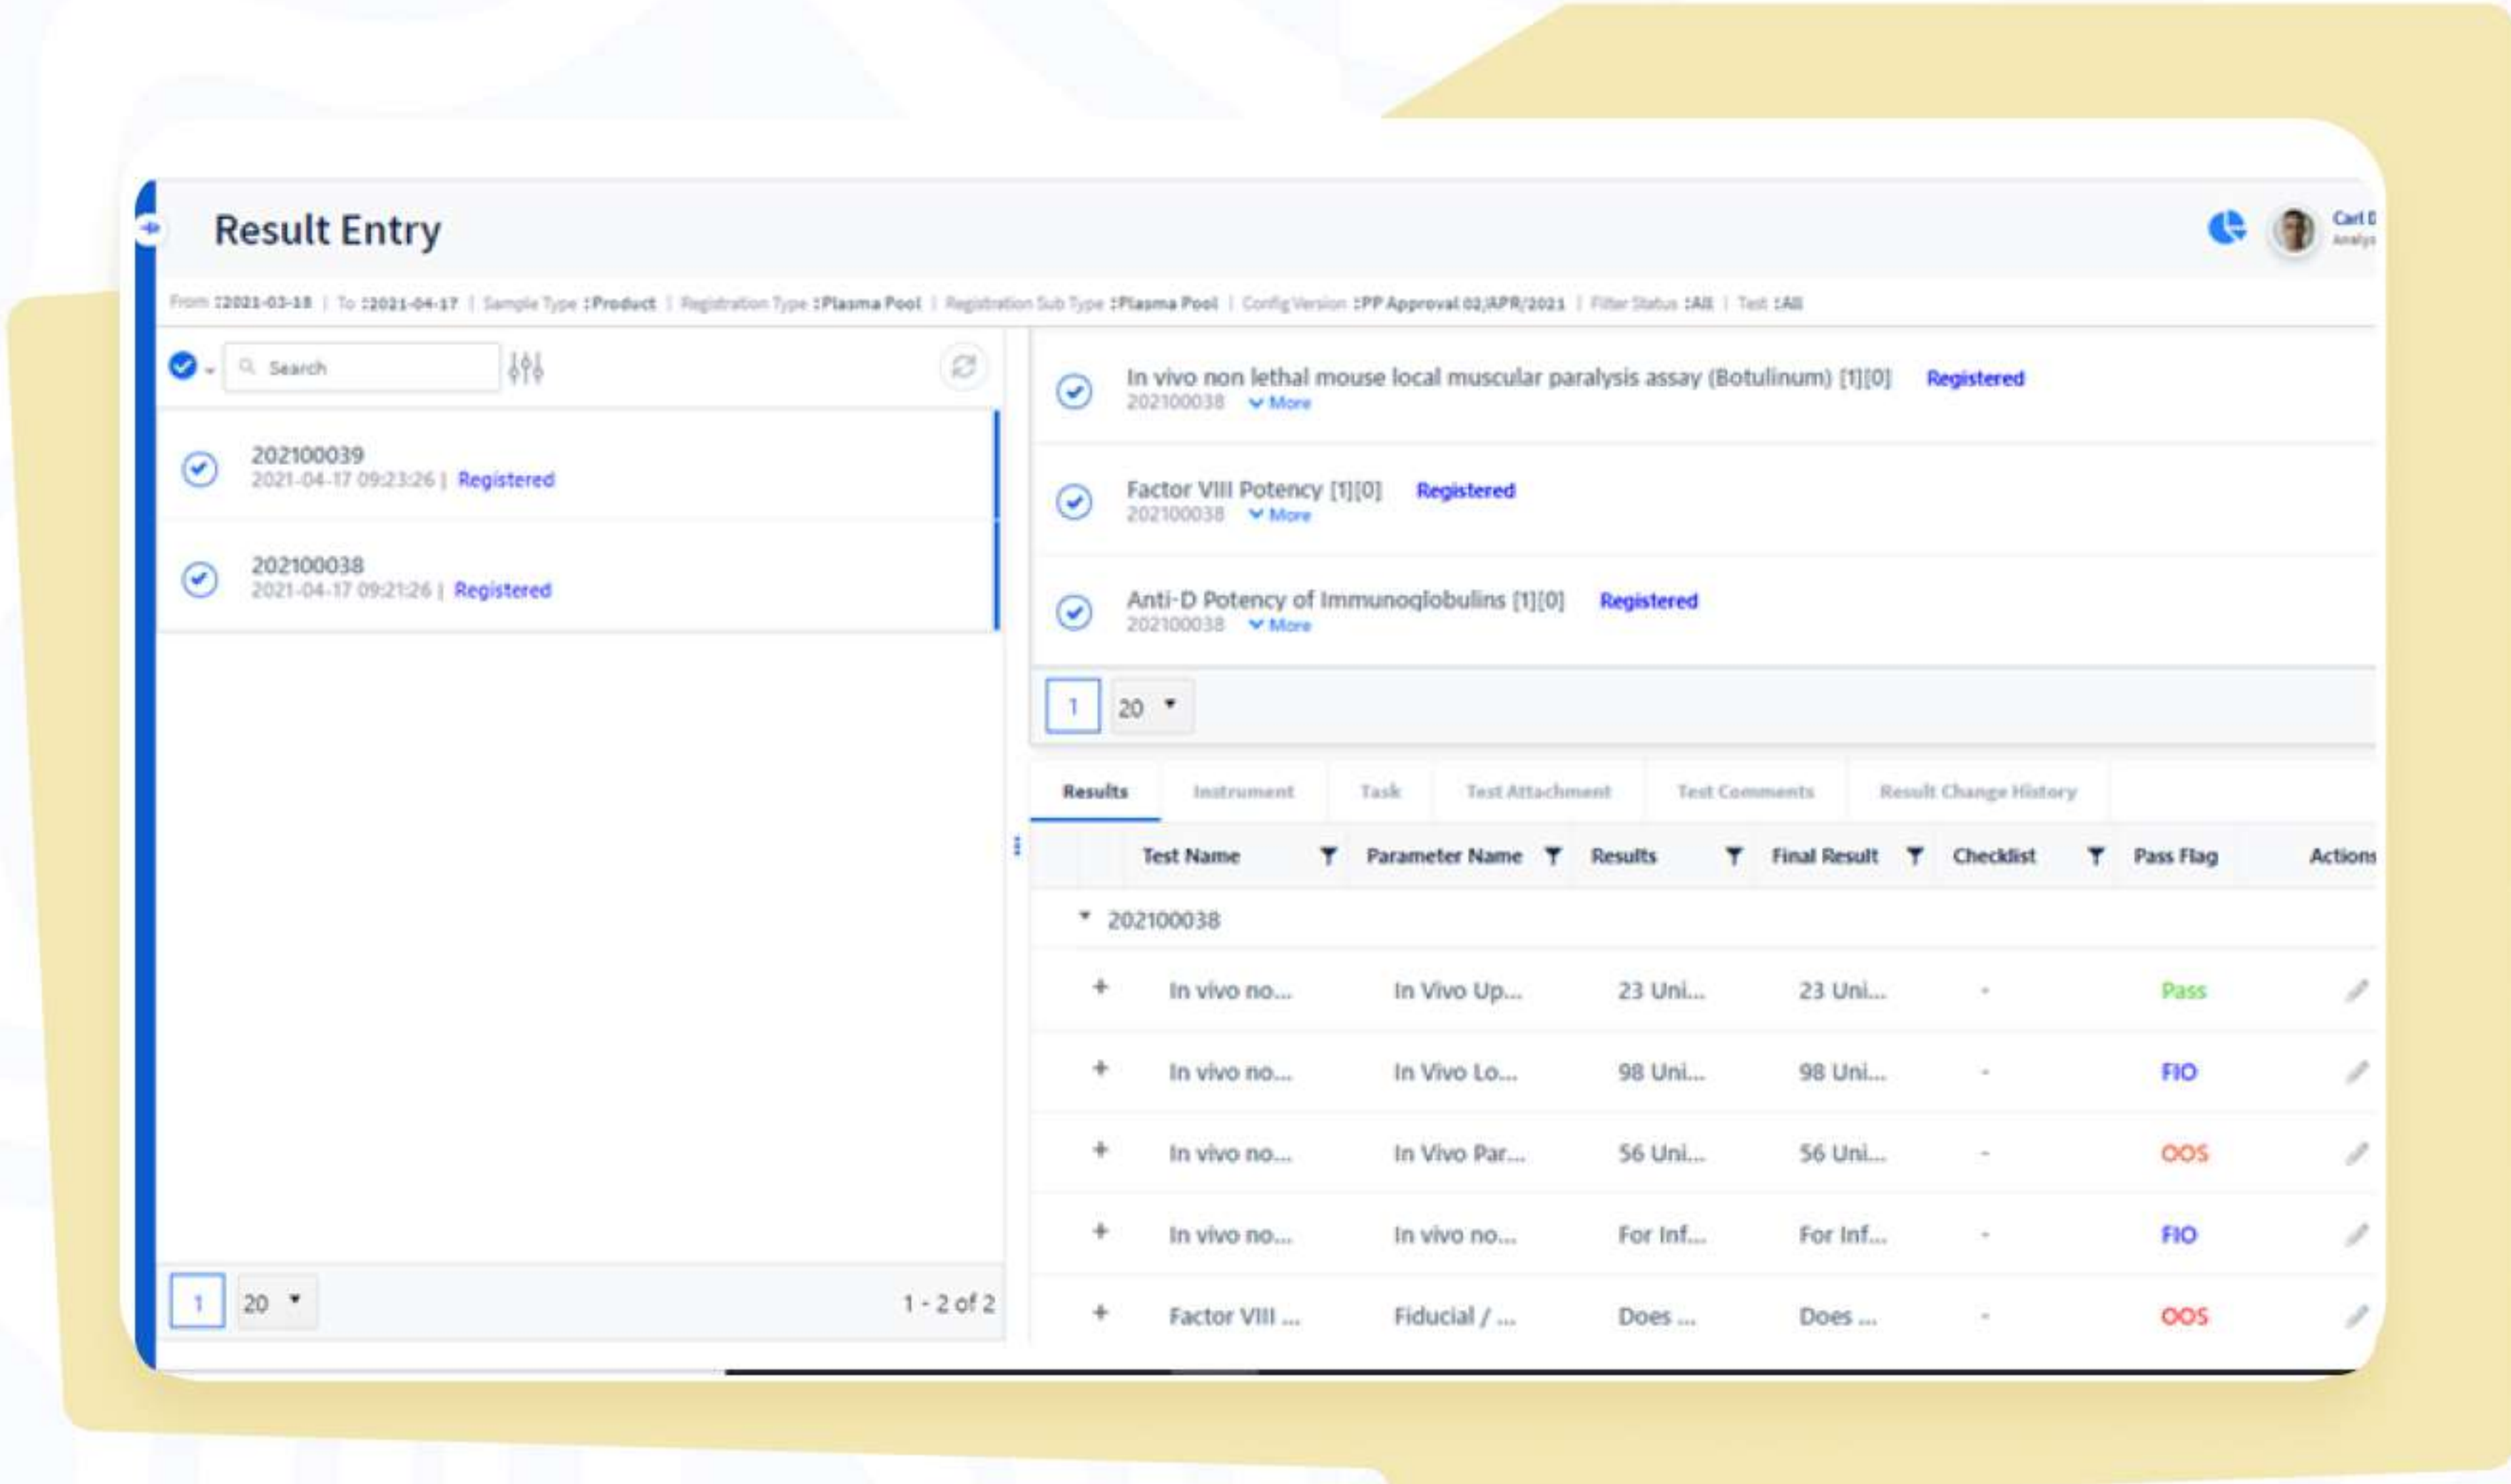

Accelerate Sample Registration, Tracking & Testing

Design dynamic registration templates to capture the right data for any sample type. Keep track of sample metadata throughout its lifecycle, ensuring complete traceability from intake to final testing.

Efficiently Assign Tasks to Lab Personnel

Assign tests & samples to the trained personnel with automated job allocation. Ensure only certified staff handle specific techniques, improving accuracy and compliance.

Record Test Results – Simplify Data Entry with Flexible Integration

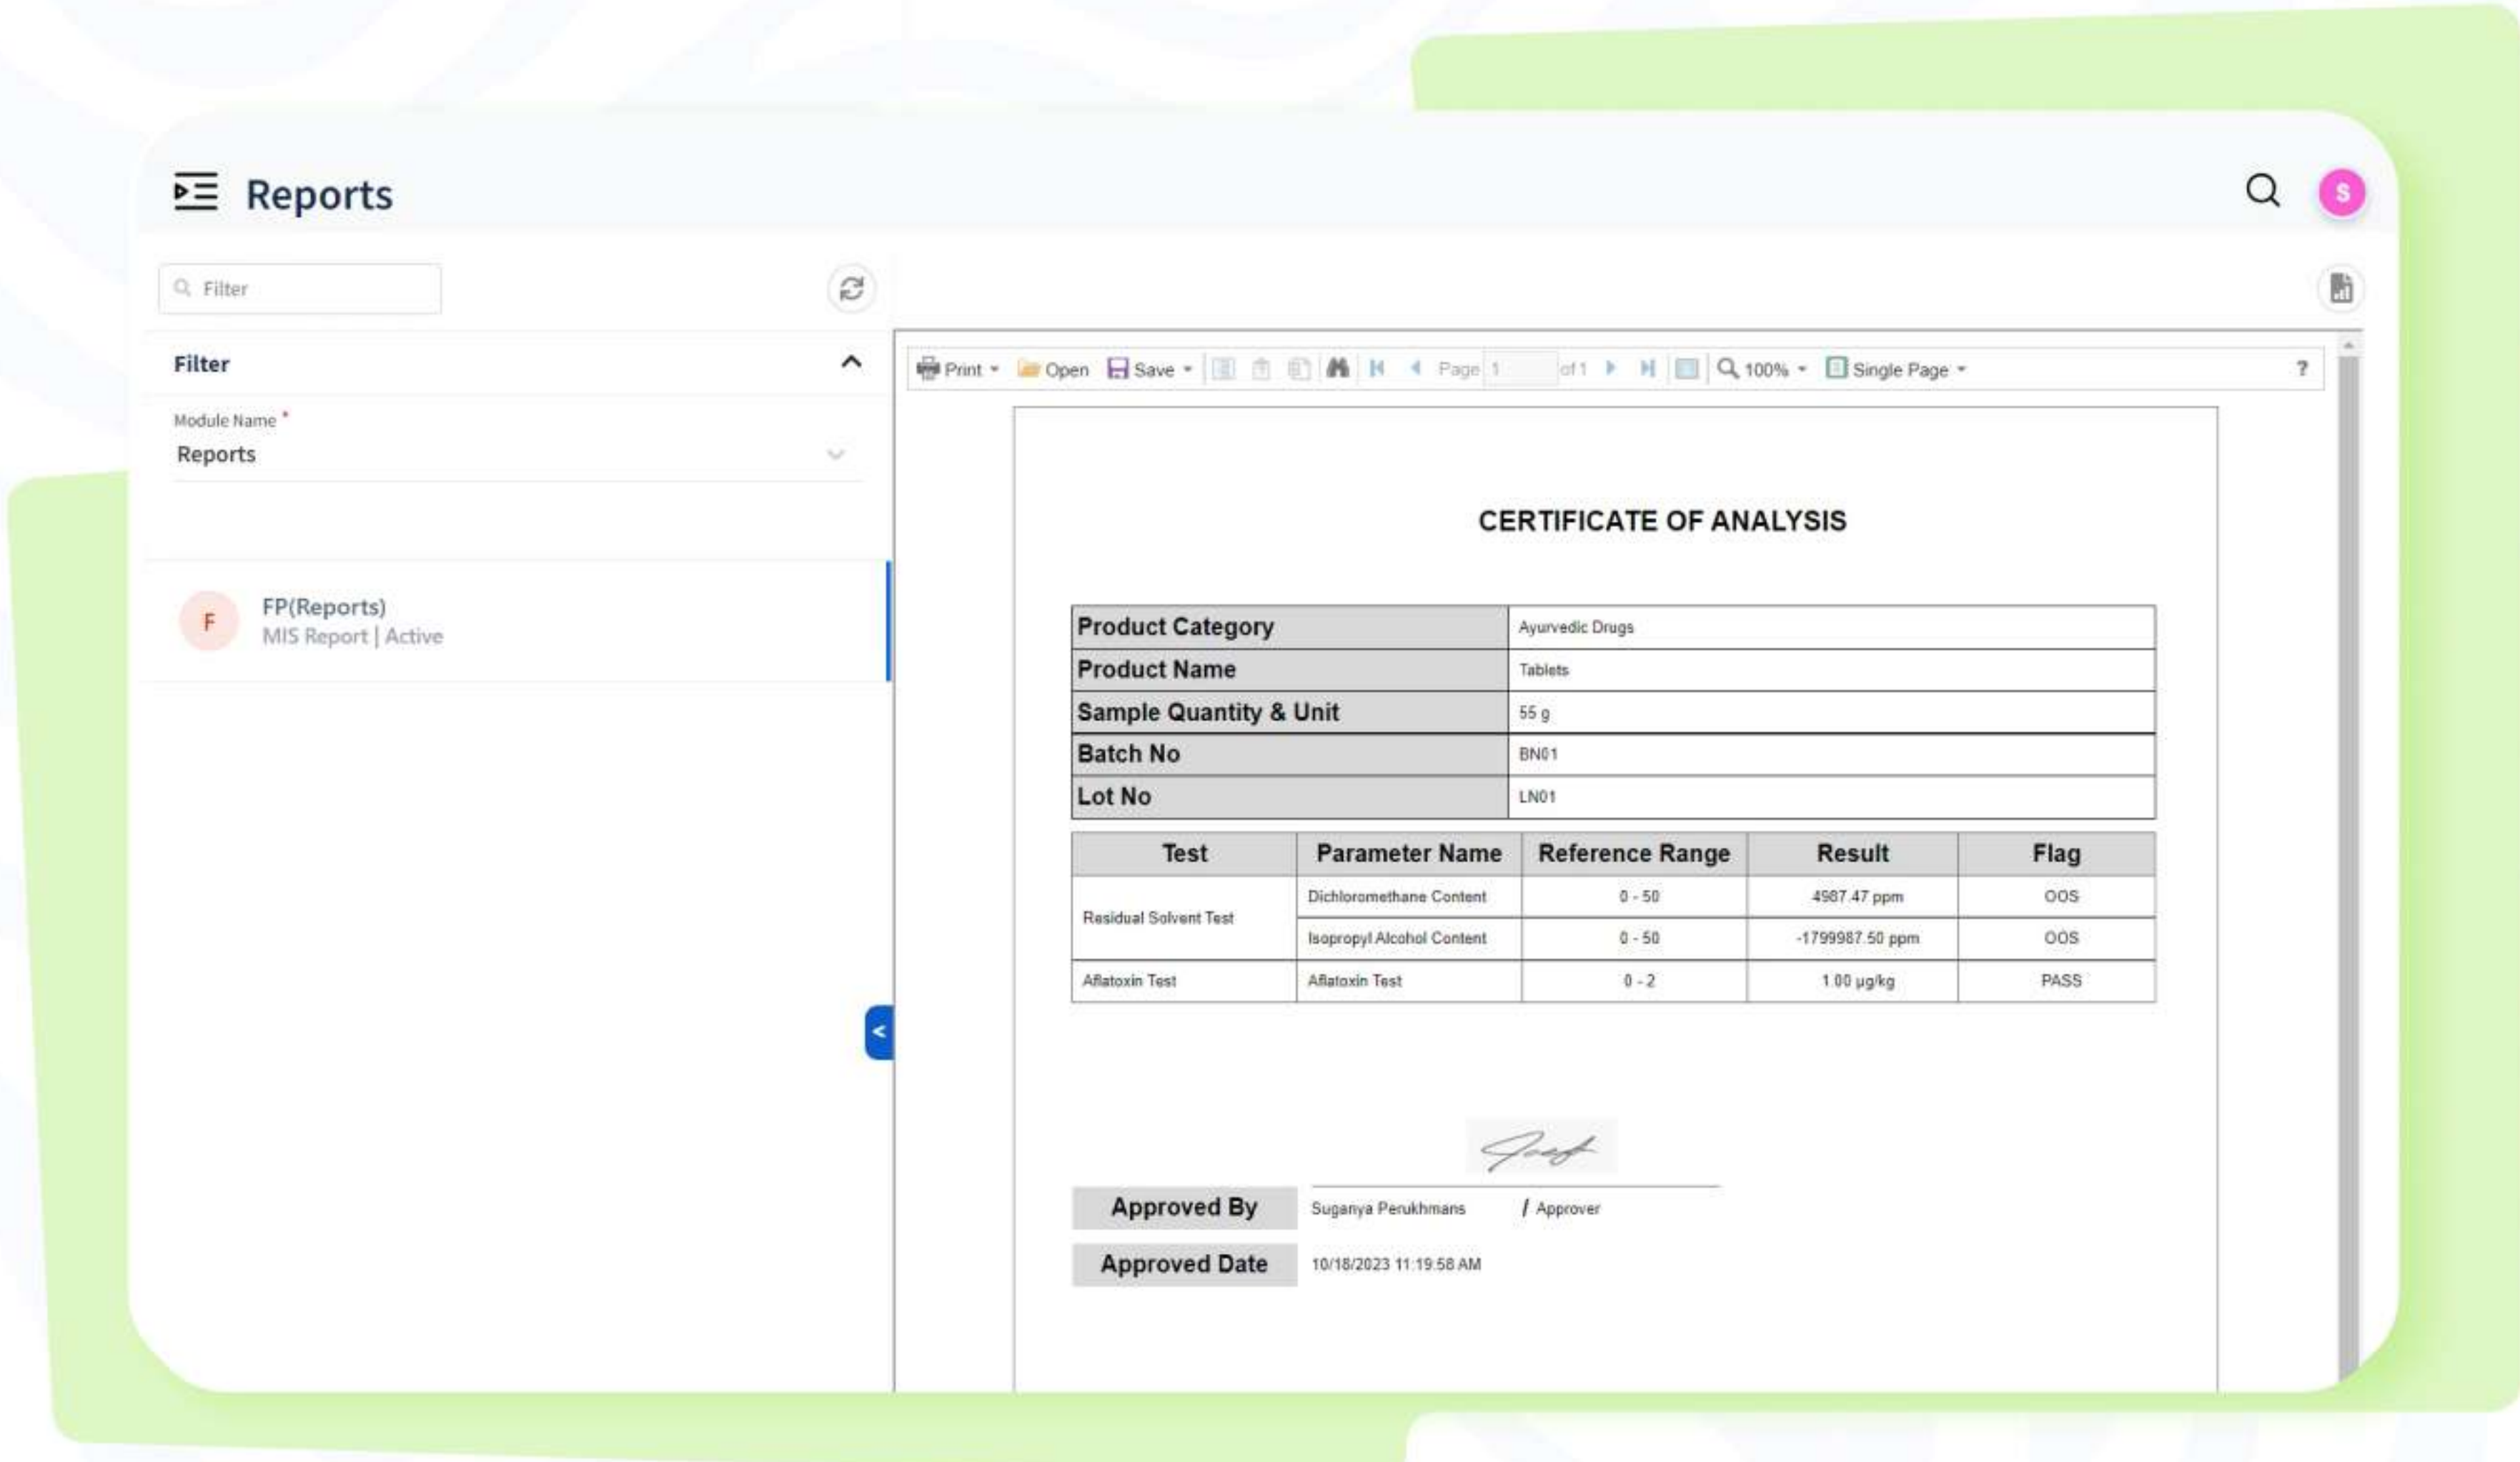

Effortlessly capture and organize test results. Input data manually through an easy-to-use interface or automate the process with direct instrument integration for seamless data transfer. Save time by reducing transcription errors and allowing authorized users to input test data based on samples and tests. Centralize all test data in one reliable platform for streamlined management.

Manage Workflows & Enforce SOP Compliance

Ensure regulatory compliance with automated SOP enforcement, approval workflows, and electronic signatures. Maintain an audit-ready environment with full traceability—no paper required.

Dynamic Reporting – Get the Insights You Need

Turn lab data into actionable insights with fully configurable reports. Create Certificate of Analysis (CoA) reports instantly, ensuring regulatory compliance and streamlined documentation. Configure data exports, automate report scheduling, and gain unparalleled visibility—without IT dependency.

Dynamic Sample Registration

Design, Validate, and Register

Design dynamic templates with drag-and-drop input fields (e.g., Number, Text, Date) for different sample types. Validate and approve templates, link them to tests, and manage version control. Register samples quickly using pre-validated templates, ensuring efficient and accurate sample processing throughout the lab lifecycle.

MOISTURE CONTENT	3.5	Comply

Test Grouping and Specifications

Organize Tests the Way You Want

Group tests based on specific assays or sample types, and organize diverse test groups. Define acceptance criteria, configure specifications dynamically, and align seamlessly with methodologies and industry standards. The system evolves with your processes, ensuring flexibility without rigid structures.

Study Planning

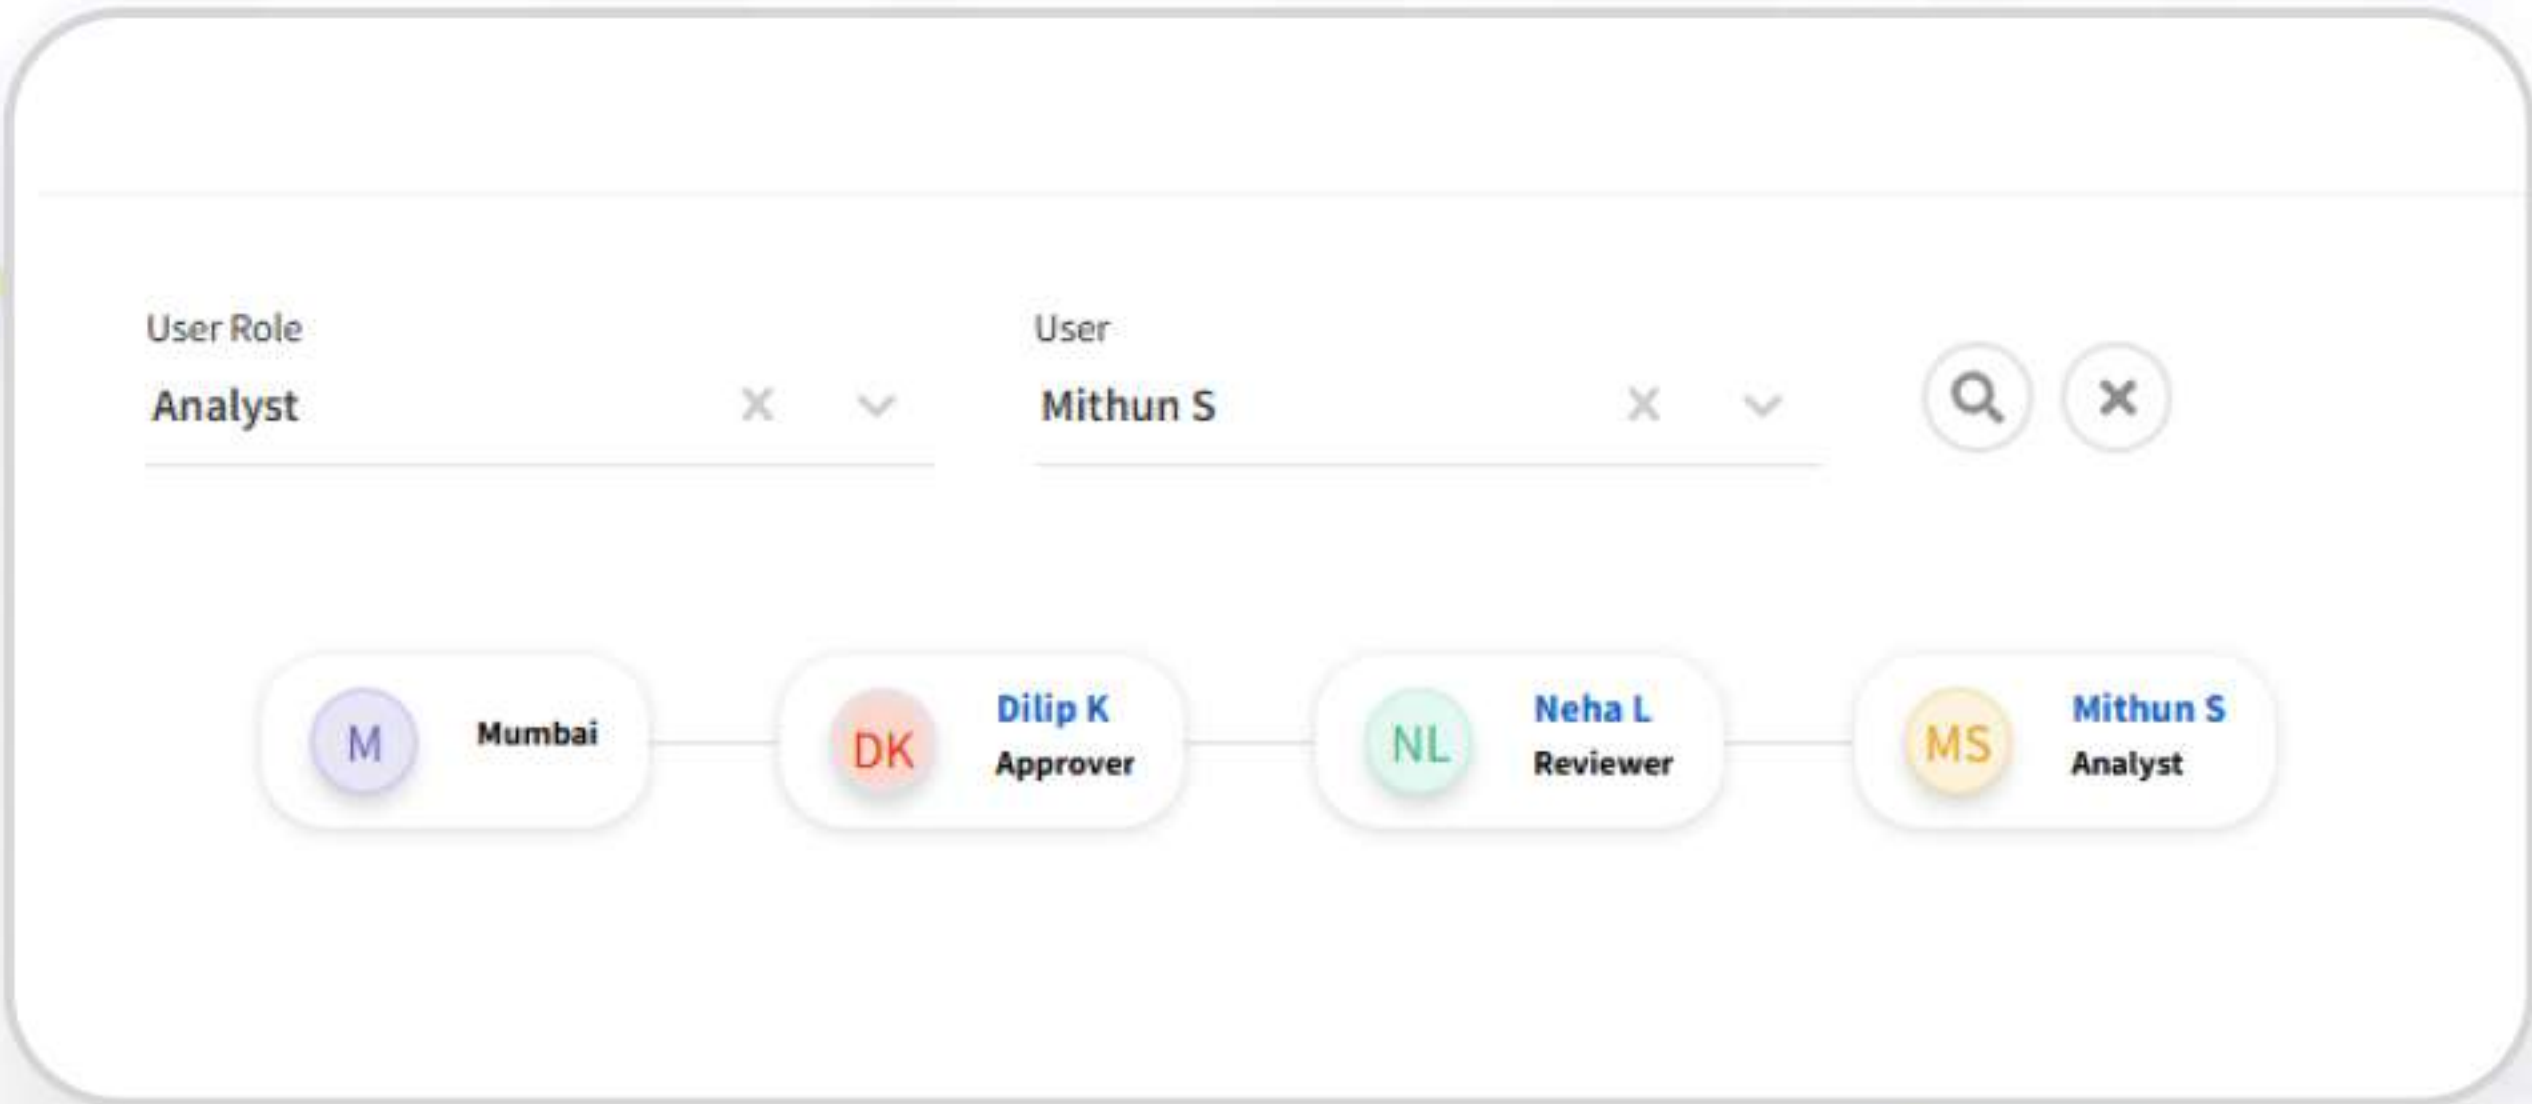

Configure Your Lab's Testing Strategy with Ease

Design and manage study plans effortlessly with Qualis LIMS. Define testing protocols, establish workflows, and configure parameters that fit your lab’s needs. Whether you're working on stability studies, batch testing, or R&D projects, our system adapts to your unique requirements.

Automated Approvals & Workflows

Let the System Do the Heavy Lifting

Eliminate bottlenecks with configurable workflow automation. Qualis LIMS lets you set up rule-based triggers, automate task assignments, and define approval processes to match your lab’s SOPs. From sample tracking to result validation, the system ensures everything flows smoothly with minimal manual intervention.

User Role Name	Approval Flow	Result Entry Flow	Project Flow
Approver	☒	☒	☒
Reviewer	☒	☐	☐
Analyst	☐	☒	☐

Role-Based Access and Approvals

Keep Data Secure and in the Right Hands

Security and compliance are non-negotiable. Granular role-based access ensures users see only what they need. Configure user roles, define approval hierarchies and implement electronic signatures for a fully audit-ready environment. Whether for regulated industry or just maintaining tight data control, access management is effortless.

Scalable Solution **for Growing Labs**

A blue circular icon containing a white cloud with the Microsoft Azure logo inside it.

Cloud-Based Deployment

offers a secure, flexible deployment on the cloud, ensuring scalability, and reduced infrastructure costs.

A blue circular icon containing a white clock face with two circular arrows around it, indicating a cycle or continuous operation.

High Availability and Reliability

Configurable architecture ensures minimal downtime and boosts system reliability.

A blue circular icon containing a white globe with latitude and longitude lines.

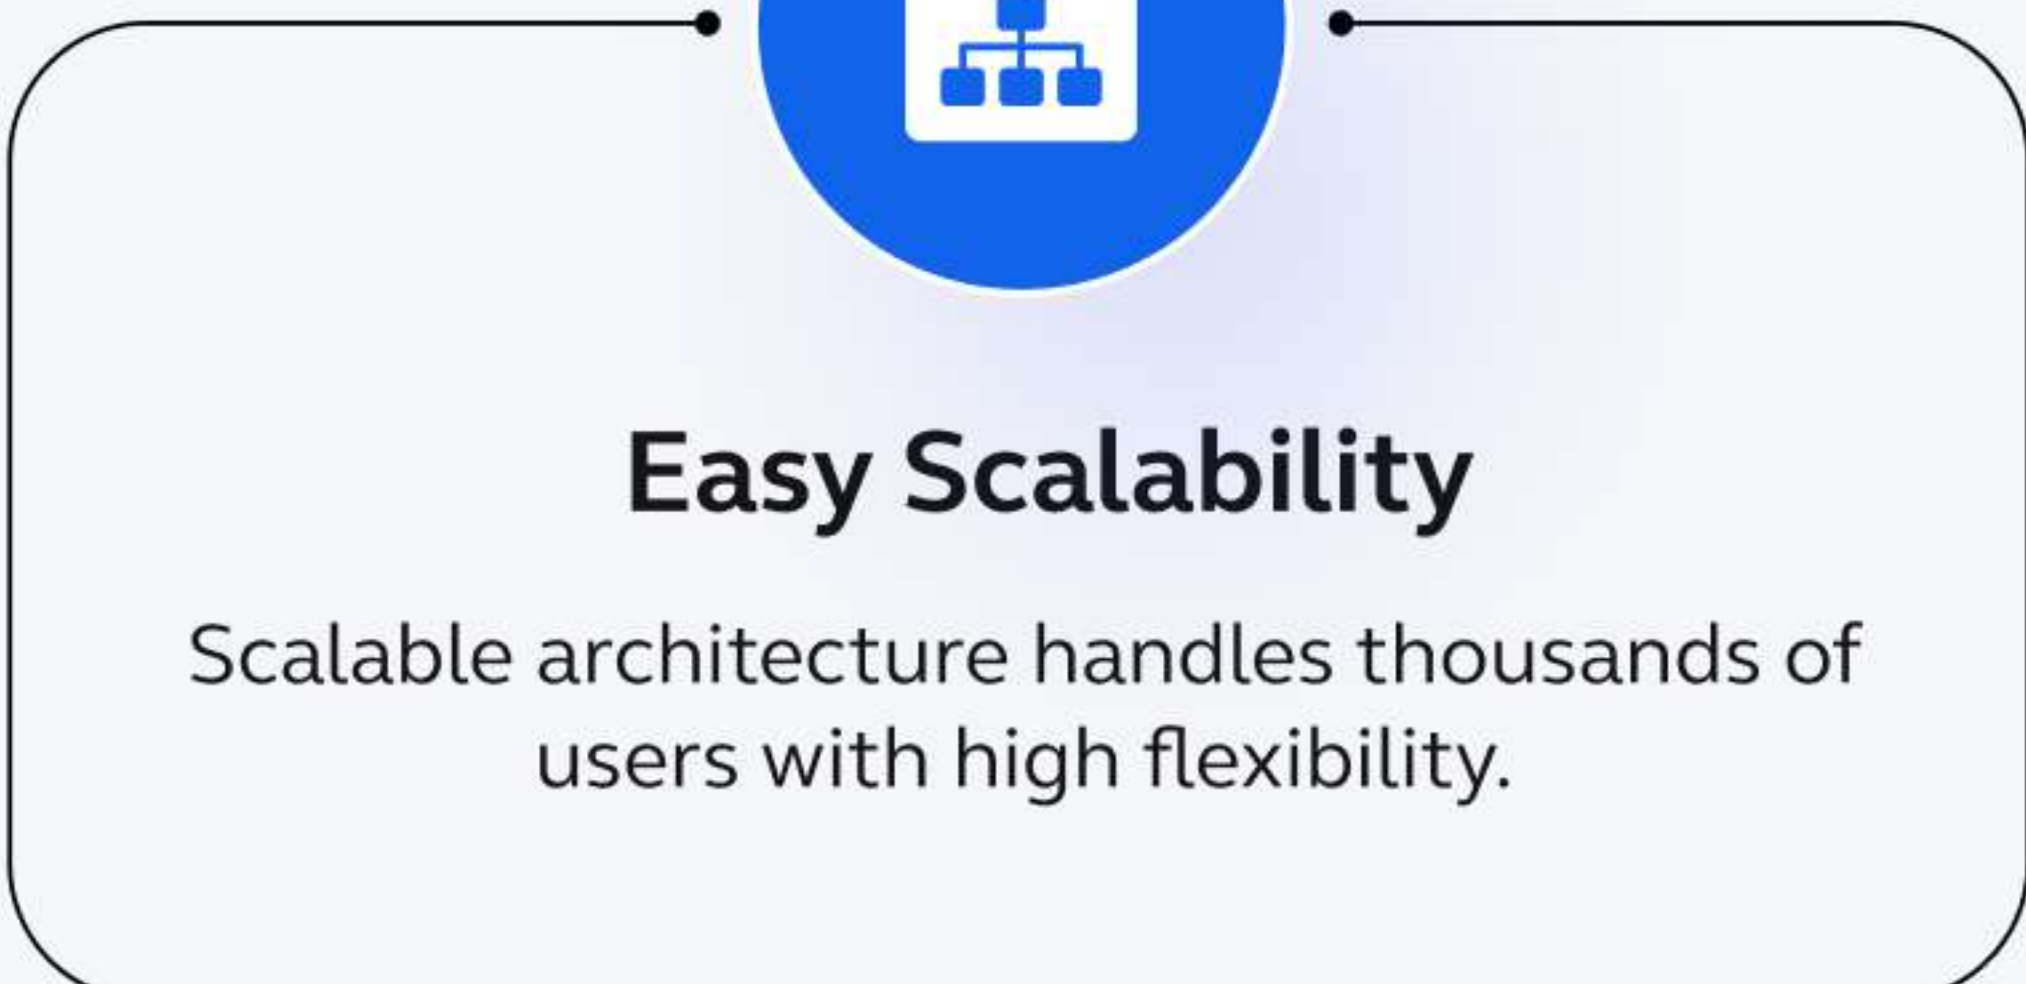

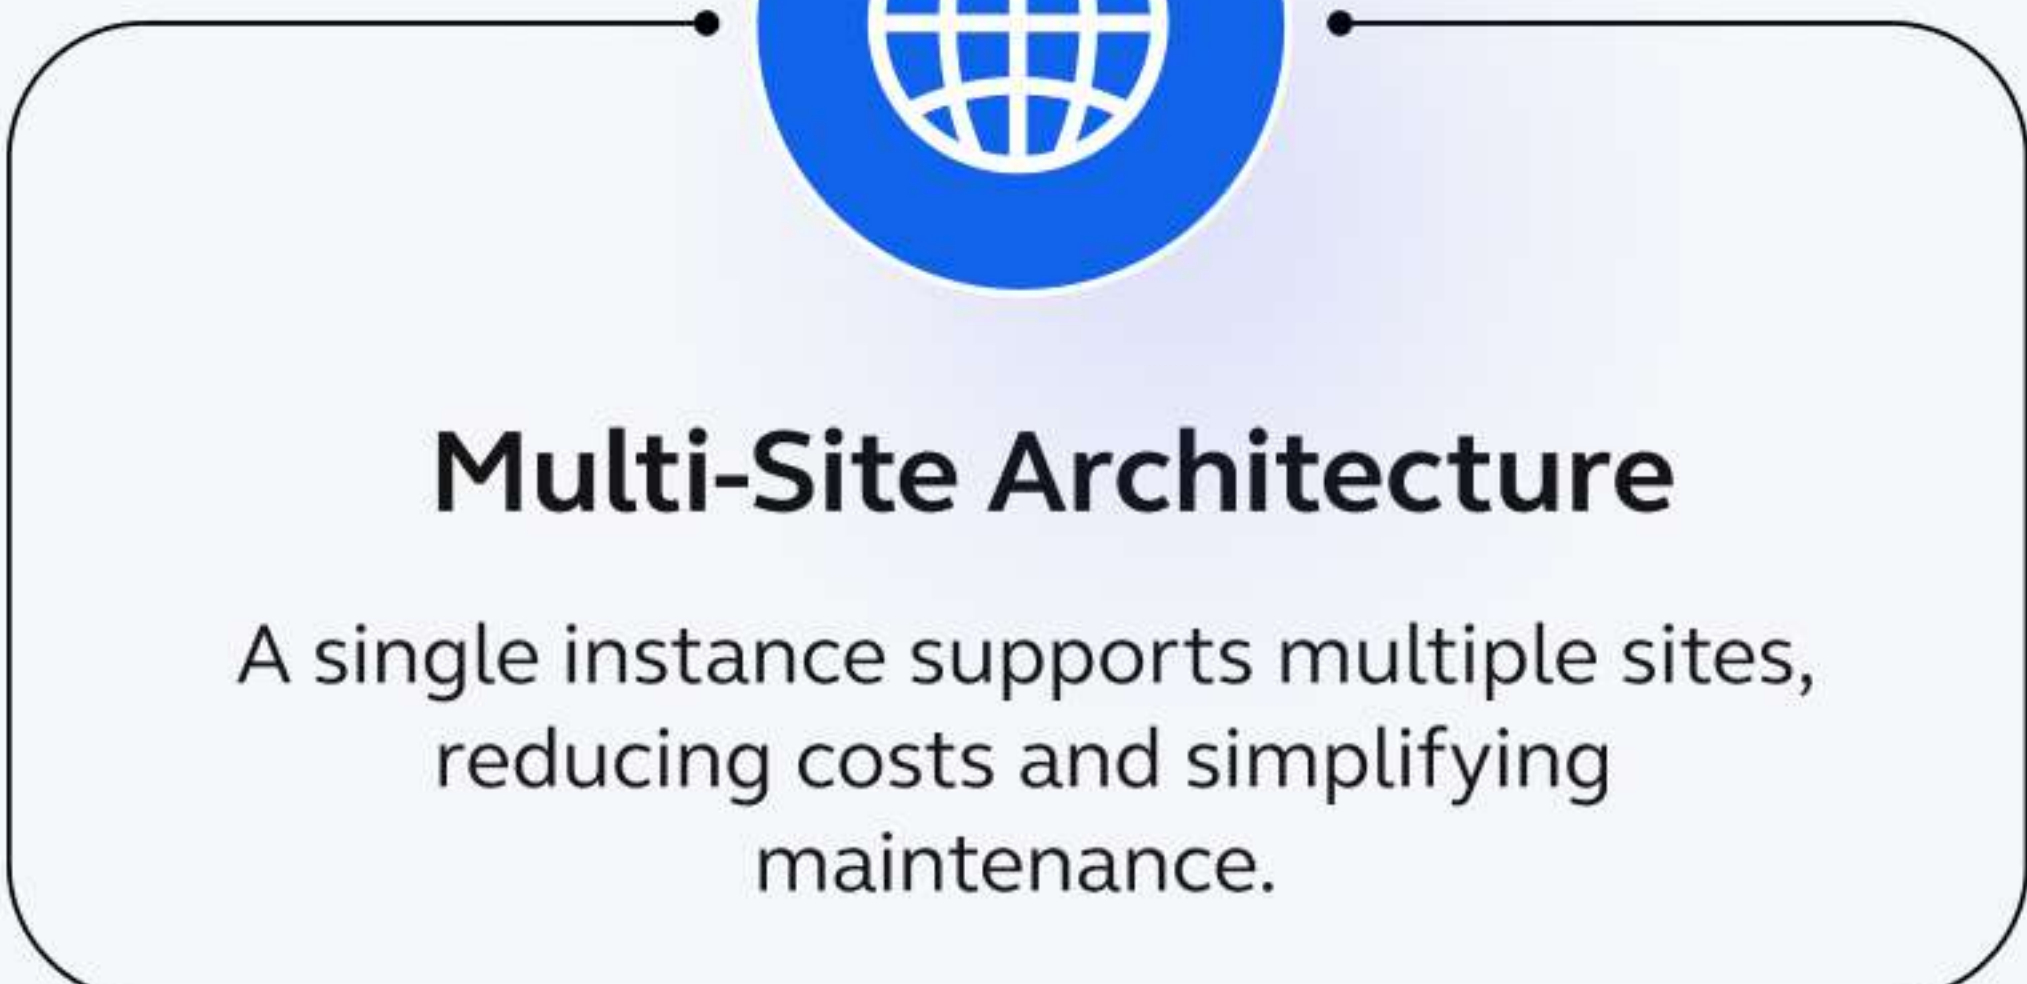

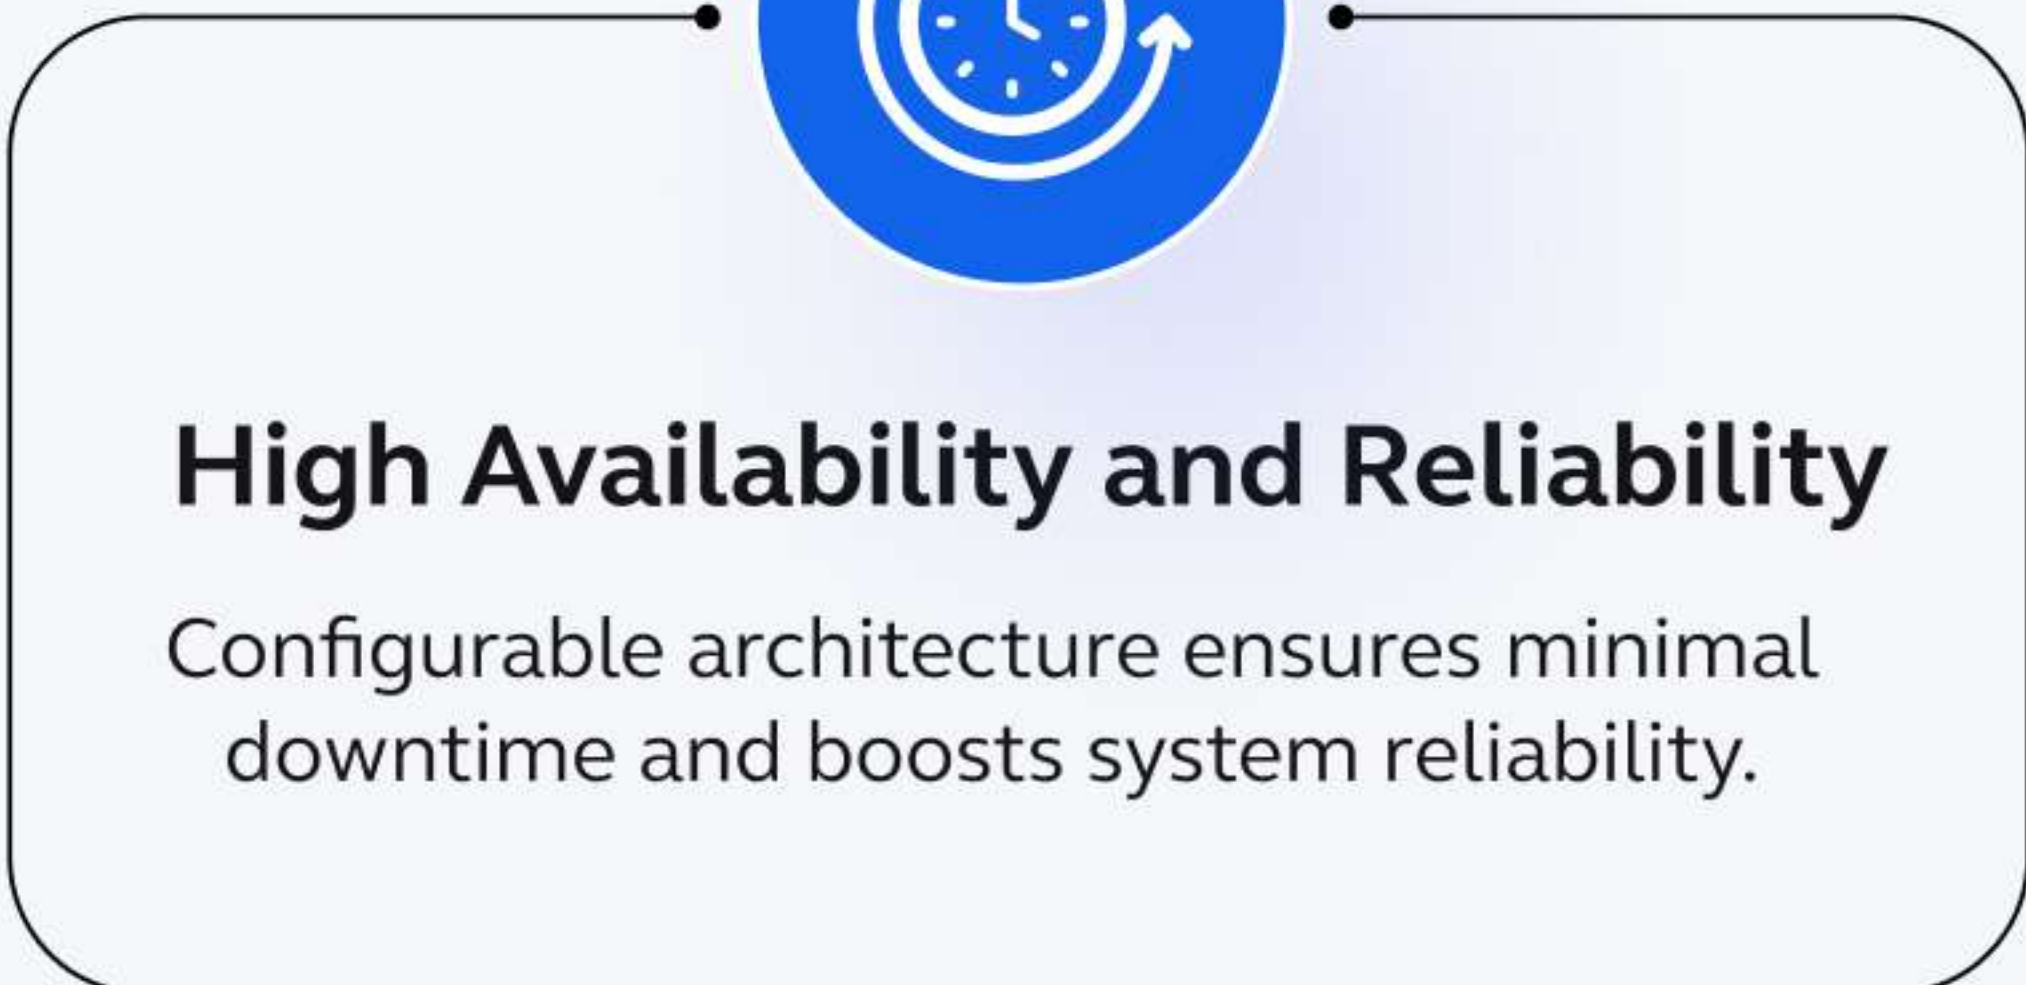

Multi-Site Architecture

A single instance supports multiple sites, reducing costs and simplifying maintenance.

Easy Scalability

Scalable architecture handles thousands of users with high flexibility.

Beyond Checkboxes: Redefining Compliance in your Lab

Achieve seamless compliance with industry standards like 21 CFR Part 11 & ISO 17025. Ensure data integrity, secure access, and auditability through a validated, paperless system.

Why go paperless with Qualis LIMS

Web-Based Accessibility

Eliminates the need for software installation, providing seamless access through standard web browsers like Chrome, Firefox, Safari, and more—on desktop and tablet.

Cost Effective Automation

Eliminates manual processes with a fully automated, paperless workflow, significantly reducing operational costs.

Designed for Labs of All Sizes

Specifically designed to support the needs of small, medium, and large labs across diverse industries.

Minimized Compliance Risks

Adheres to industry standards like 21 CFR Part 11 and Eudralex Annex 11, reducing the risk of non-compliance with regulatory requirements.

One Solution, Endless Integrations: Connect Your Lab Instruments with Ease

Use out-of-box integrations directly within **Qualis LIMS**, and connect LIMS to other software solutions via REST API'S

Seamlessly transfer validated results into LIMS using an advanced parser

Capture & Record Instrument Data effortlessly

Other external systems

Integrate Via REST API'S
